Quickpay subscription plans

Introduction

This module adds further functionality to the Quickpay module built for Prestashop by helping store owners create subscription products for registered customers.

Functionalities

- Add a subscription option to your products.
- Create unique subscription frequencies for each product.
- Separate subscription history page within customer profile.
- Customers can cancel their subscription.
- Store owners can see subscription history.

Prerequisites

- Latest Quickpay Prestashop module (<https://quickpay.net/integrations/prestashop/>)
- Quickpay Prestashop module fully configured

Informations

- The module was tested on the classic theme
- Other themes may require modifications for the cart page's javascript code

User flow

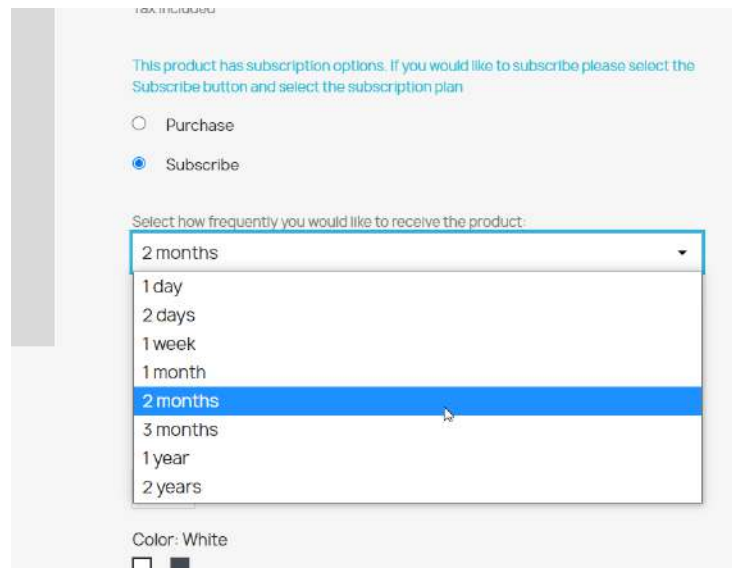

Keep in mind that the subscription function is only available for customers who have an existing account on the store.

Product page

In case the given product has a subscription option attached to it, the customer can toggle between purchasing or subscribing to that product by using the radio buttons located in the product information block.

After selecting the “Subscription” option the customer can select how frequently he would like to have the product delivered in the dropdown list appearing below the two radio buttons.

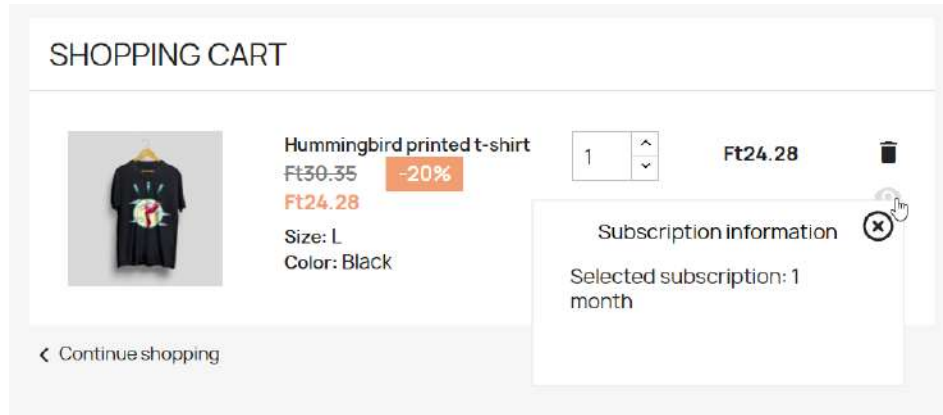

We recommend setting up the needed quantity and variants before selecting the subscription option, because if **any variant changes occur after setting up the product as a subscription, it will revert back to being a one time purchase product**. This feature ensures that no accidental quantity or variant changes will have effect on the subscribed product.

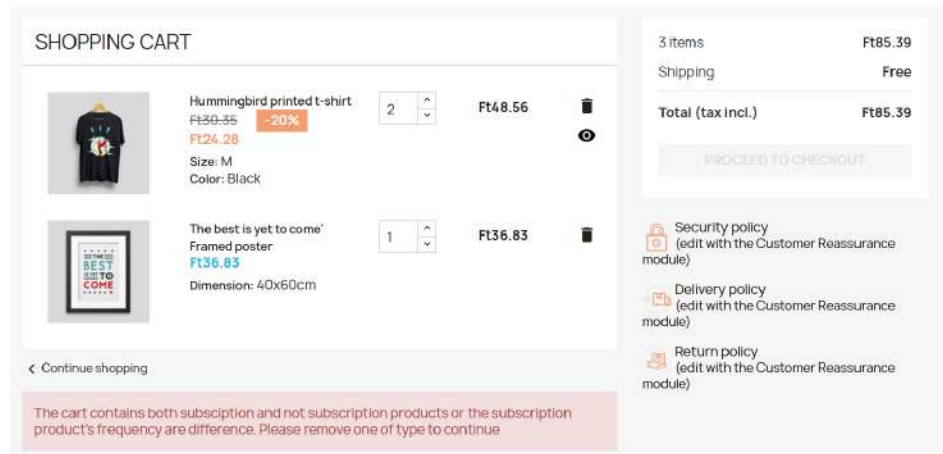

Currently only one subscription type product can be placed in the cart. If there's a subscription product in the cart already, the customer won't see the option on other product pages for a subscription - if they would like to subscribe to different products, they will have to make separate purchases for each.

Cart summary

In the cart summary page the subscription products are marked with an eye () icon. When clicking on this icon, the customer can get more information about the selected subscription frequency for the given product.

Important thing to keep in mind is **there cannot be a subscription and one time purchase products at the same time in the cart**. If both are present, the customer won't be able to proceed and a warning label will appear below the cart summary.

To resolve this issue the customer will have to remove either the subscription- or the one time purchase products from their cart - if only one type of product (*subscription* or *one time purchase*) is present in the cart, the checkout button will be enabled again.

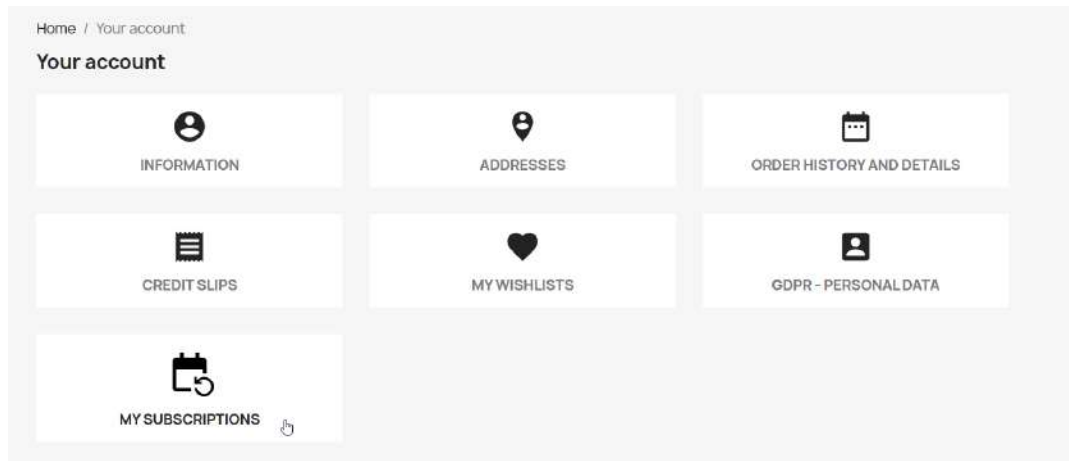

Checkout

The checkout flow is the same as it is for one time purchase products.

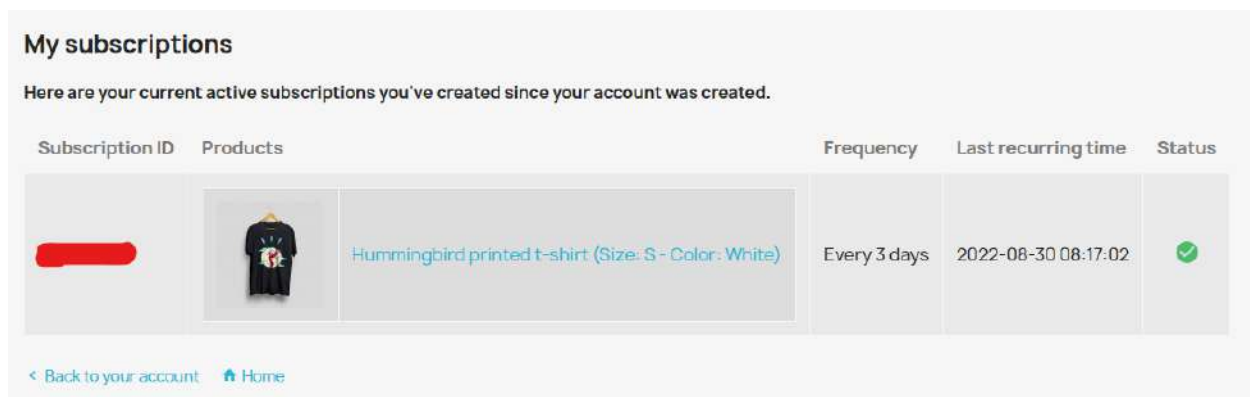

Subscription history

Customers can also view their past and current subscriptions in their profile.

If the module is enabled a new menu point is accessible within the customer profile called “My Subscriptions”.

Visiting this menu point the customer can get more information about every subscription which is associated with his profile.

Subscriptions which are checked with a green mark (✓) are active, those which are marked with a red cross (✗) are canceled subscriptions.

Depending on the back office settings customers can have the ability to cancel their subscriptions from this page.

Frequency	Last recurring time	Status	
Every 2 weeks	2022-07-28 13:14:42		Cancel
Every 2 days	2022-05-20 15:28:22		Cancel
Every day	2022-05-18 20:34:01		
Every day	2022-05-		

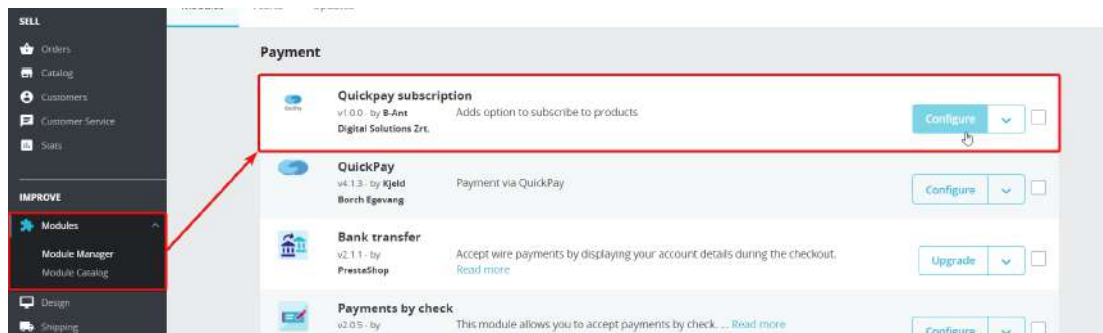

Keep in mind that if a subscription is canceled, the only way to re-enable it is by going through a new subscription product order - more details about the required steps can be found above.

Shop owner

In this section we'd like to give some insight about the module settings available for store owners.

General settings

The general settings are available within the Modules tab in the back office. Search for the term "quickpay subscription" to find it quicker.

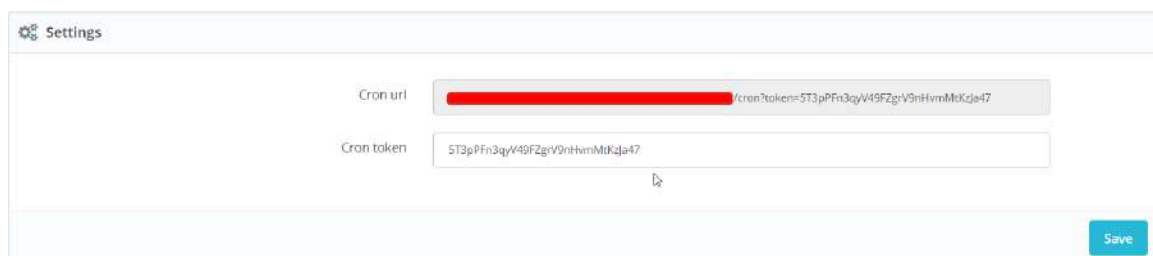

Enable subscriptions / user cancel

Within the main settings, the shop owners have the ability:

- to enable or disable the subscriptions by using the **Enable subscriptions** option,
- let customers manage their active subscriptions by allowing them to cancel it themselves, by enabling the **User cancel** option.
- to enable or disable the other payment options for subscription orders with the **Disable other payment methods** switch.
- customers can decide if they want to enable or disable the option to show the subscription products for not logged in users with the **Show subscription information when not logged in** switch.

Cron

Within the general settings shop owners can create unique cron URL-s by changing the value in the **Cron token** field.

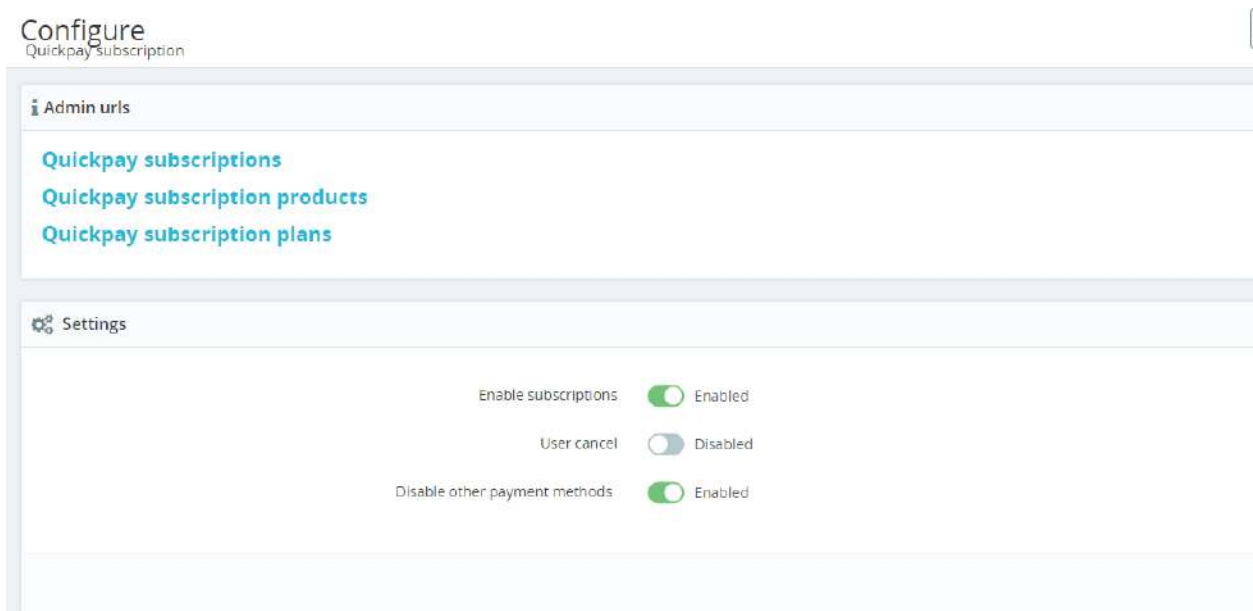

Keep in mind that the new token will only be available after the form is submitted. This can be done by clicking on the **Save** button in the bottom right corner.

In the top section of the general settings there are 3 links, namely:

- **Quickpay subscriptions** (list about currently active and past subscriptions),
- **Quickpay subscription products** (list of products which have a subscription attached to it),
- **Quickpay subscription plans** (translation options for the available frequency types).

These options are also available in the sidebar, inside the **More** section.

Subscription settings

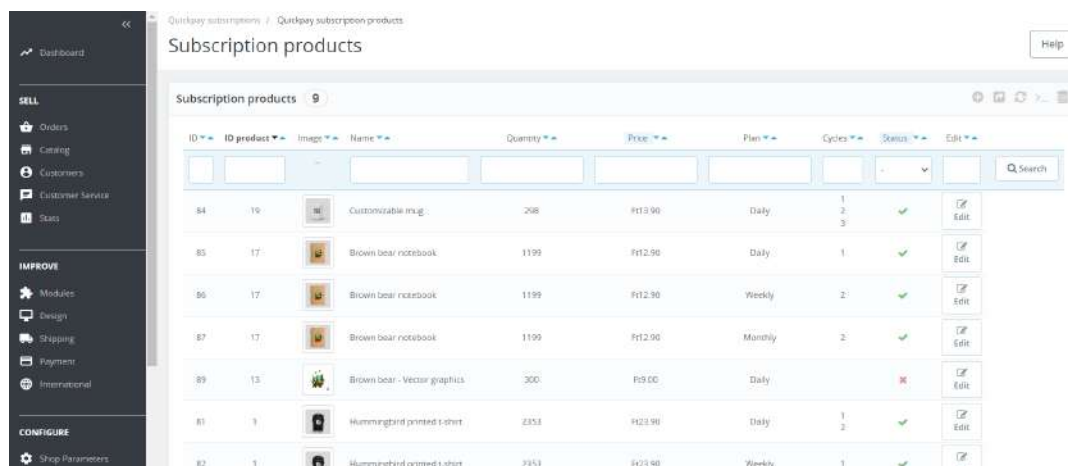

Quickpay subscriptions

On this page shop owners get an overview about all subscriptions associated with the site. They can search for specific subscriptions based on different attributes by using the search bar on the top of the table, or even cancel active subscriptions by clicking on the green mark (✓) icon below the **Status** column in the given row.

Keep in mind that canceled subscriptions cannot be reverted, the customer will have to make a new order if they want to restore their subscriptions.

Quickpay subscription products

On this page shop owners can get an overview of all products which have a subscription option attached to.

They have the ability to disable the subscription option for the products by clicking on the green mark (✓) icon. Disabled subscription products can be re-enabled by clicking on the red cross (✗) icon.

New subscription for a product

We have several options for adding the subscription functionality to a new product:

- By clicking on the **Add new** option in the toolbar above the list we can select which product we'd like to add the subscription functionality into, select a plan (this can be modified later on) and we can choose if we'd like to have it enabled from the get go or not.

The screenshot shows the 'Subscription products' interface. At the top, there is a toolbar with an 'Add new' button. Below the toolbar is a table with columns: ID, ID product, Image, Name, Quantity, Price, Plan, Cycles, Status, and Edit. The table contains two rows of data:

ID	ID product	Image	Name	Quantity	Price	Plan	Cycles	Status	Edit
84	19		Customizable mug	298	Ft13.90	Daily	1 2 3	✓	Edit
85	17		Brown bear notebook	1199	Ft12.90	Daily	1	✓	Edit

Below the table is a 'Quickpay subscription plan' form with the following fields:

- * Product: Hummingbird printed swc
- * Plan: Daily
- Status: Enabled Disabled

Buttons for 'Cancel' and 'Save' are located at the bottom of the form.

- Another option is to do it from the product settings page:

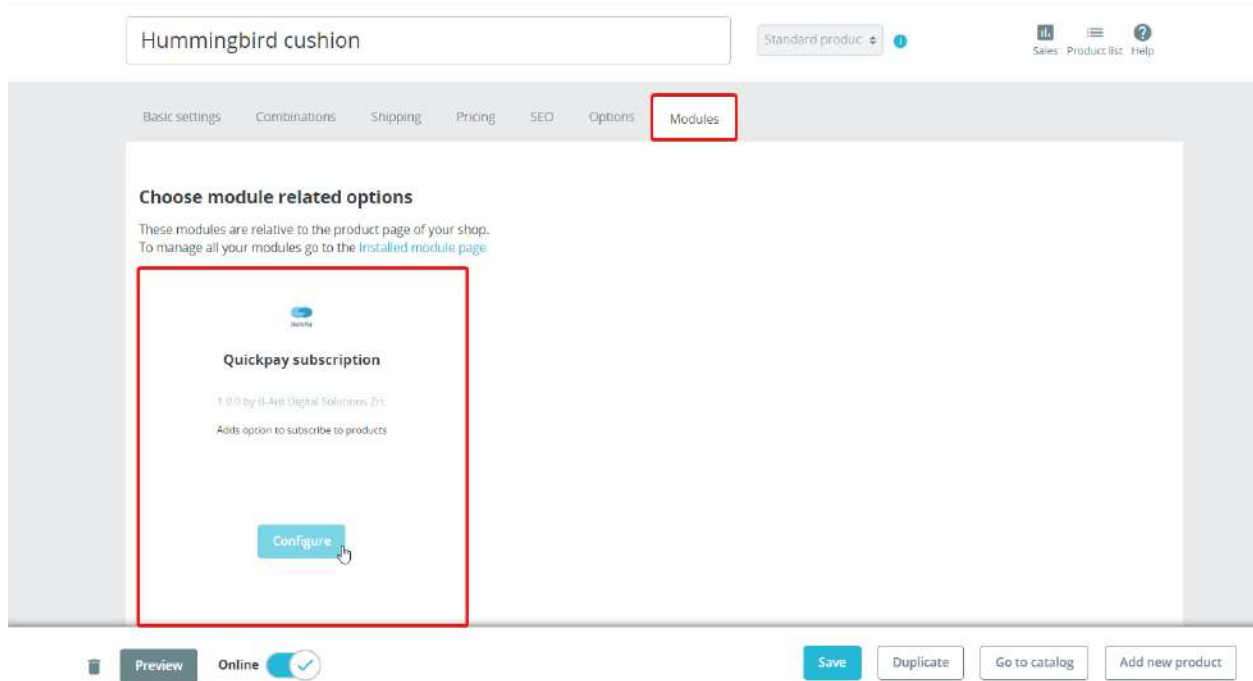

For this we need to navigate to the product which we'd like to add the subscription into.

We can do this by selecting the **Products** option from the **Catalog** tab and select the given product from there:

The screenshot shows the 'Products' page in the catalog. The left sidebar has a 'SELL' section with 'Catalog' selected, and 'Products' highlighted with a red box. A red arrow points from the 'Products' menu item to the 'Hummingbird cushion' product in the main list. The product list has columns for ID, Image, Name, ID product, Category, and Price:

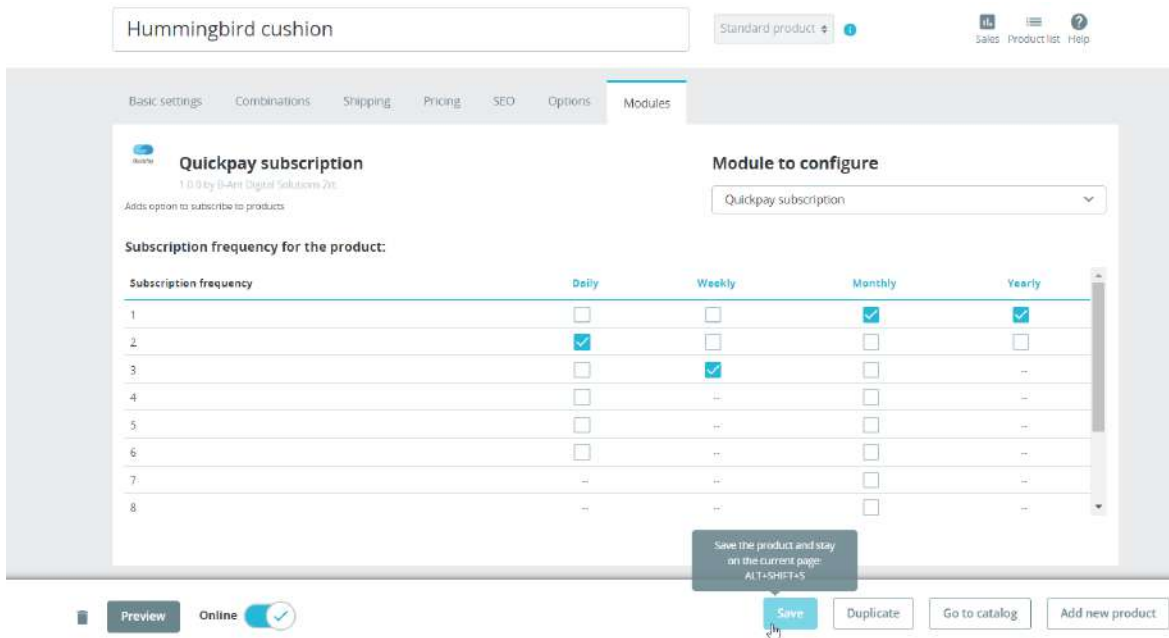

ID	Image	Name	ID product	Category	Price
16		Mountain fox notebook	demo_8	Stationery	Ft12.90
15		Pack Mug + Framed poster	demo_21	Home Accessories	Ft35.00
14		Hummingbird - Vector graphics	demo_20	Art	Ft9.00
13		Brown bear - Vector graphics	demo_19	Art	Ft9.00
12		Mountain fox - Vector graphics	demo_18	Art	Ft9.00
11		Hummingbird cushion	demo_17	Home Accessories	Ft18.90
10		Brown bear cushion	demo_16	Home Accessories	Ft18.90
9		Mountain fox cushion	demo_15	Home Accessories	Ft18.90

Here, select the **Modules** tab and click on the **Quickpay subscription - Configure** button.

On the next page you can select the recurring order frequency options for that product.
In this example the *Hummingbird cushion* will have the following subscription frequency options:

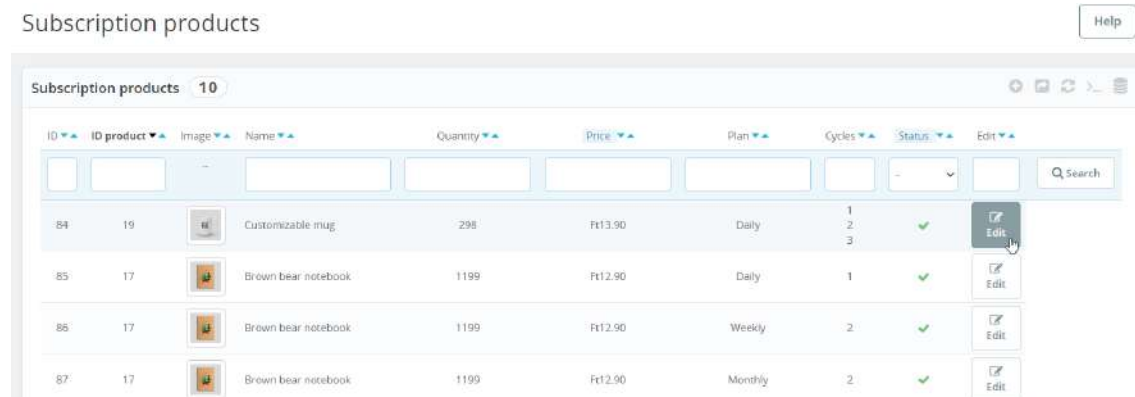

- 2 days,
- 3 weeks,
- 1 month,
- 1 year.

After we're done setting up the frequency options, clicking on the **Save** button will save the settings for this product.

Editing existing subscriptions

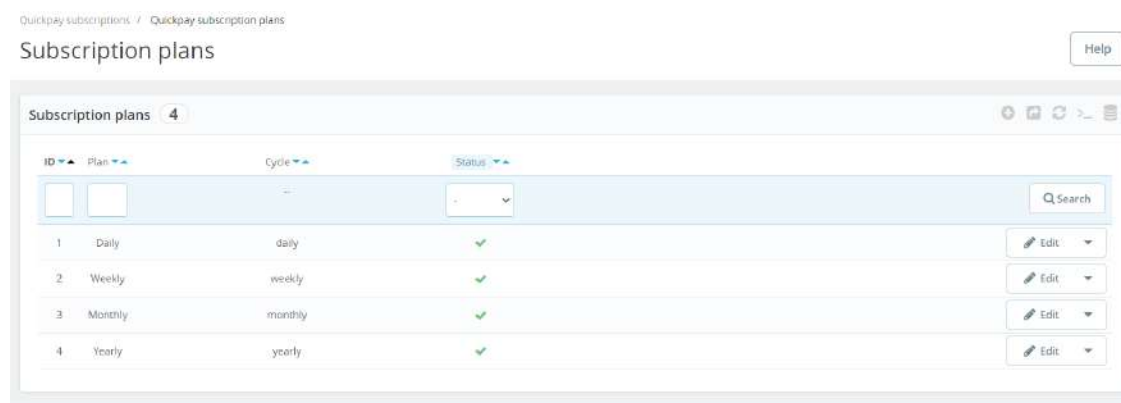

Shop owners can also edit existing subscriptions, by clicking on the **Edit** button for the selected product.

This will redirect them to the product's settings page, where they can adjust the frequencies explained in the "[New subscription for a product](#)" section above.

Quickpay subscription plans

This page is mostly useful for multilingual sites.

Here, you can edit the translation for each plan type by selecting the **Edit** option.
